EXPERIENCE

Company:Casters, Remote/Freelance— *Web Developer* —*https://casters.ro/*

2023 june - 2023 september

Developed a Wordpress website to showcase the company's products and services. Worked with Elementor and other plugins to improve SEO and Security as well as website's visibility and reach.

PROJECTS

Data Entry Application — *Duration: 3 MONTHS*—

https://github.com/nikitadilevschi/Data-Entry-App

Worked on a comprehensive Data Entry Application utilizing Python, MySQL, and Tkinter. The application was meticulously designed to streamline data entry processes and facilitate efficient management of tournament data.

Math Quiz Web Application — *Duration: 3 MONTHS*

Developed a multiple answer Quiz with timer using HTML5, CSS3, Bootstrap, Javascript.

AI Traffic Sign Classification — *Duration: 1 MONTH*—

https://github.com/nikitadilevschi/AI__APP

I led the development of an advanced AI model using Keras, Python and Tkinter for the UI of the program, tailored specifically for the recognition of traffic signs. Leveraging a comprehensive dataset of traffic sign images, I trained the model to accurately classify various types of traffic signs.

SKILLS

Version Control Git.

Python, Django, Tkinter, MySQL.

HTML5, CSS3, Bootstrap5, Javascript.

Networking, Cloud Computing.

Programming, Web Development.

AWARDS

AWS Cloud Practitioner (Fundamental) Certification

LANGUAGES

English, Romanian, Russian.

EDUCATION

West Ealing Green College, London— ICT *BTEC Extended Diploma - DDM*

2019 - 2022

As an ICT student, I've been involved in 18 units provided by the college where I studied Programming, Cyber Security, Databases and other related subjects.

Nail Salon Website — *Duration: 2 MONTHS*— http://132.145.54.33/— **Live Project**
https://github.com/nikitadilevschi/Nail-Salon-PHP

Developed a website and its administration panel to manage data on the website using PHP, HTML5, CSS3, Bootstrap, then hosted on Oracle Cloud Server.

E-commerce Website — *Duration: IN PROGRESS*— *https://husle.store/* — **Live Project**
https://github.com/nikitadilevschi/Ecommerce-Django

Currently leading the development of an E-Commerce application, leveraging a robust stack of technologies including Python and Django Framework for backend development, complemented by HTML5, CSS3, Bootstrap, and JavaScript for front-end design and functionality. Additionally, implementing database management using Postgresql. Demonstrating proficiency in hosting websites on cloud platforms and acquiring domain names, further enhancing practical skills and project management capabilities.

Ravensbourne University, London— *BSc(Hons) Cyber Security*

2022 - current

My coursework has extensively focused on networking, programming and cyber security where I gained practical experience to design and implement through individual and group projects. Additionally, I have honed my web development skills. Moreover, my education has provided me with a solid understanding of cybersecurity principles and practices.
